ABOUT ME

Ephraim Debel

| Software Engineer & Web Developer

I am a software engineering student at Addis Ababa Institute of Technology (AAIT) with a strong passion for web development. I have completed a full-stack web development course at EDIAfrica, where I gained hands-on experience in building dynamic and scalable web applications. My technical skills span across front-end and back-end technologies, including HTML, CSS, JavaScript, React, Node.js, Express, and MySQL. I enjoy collaborating on projects to create robust front-end and back-end solutions.

Throughout my journey, I have set myself apart by consistently seeking out new knowledge to develop seamless user experiences and efficient solutions. My commitment to learning and my ability to adapt to new challenges have been instrumental in enhancing my skills. I pride myself on my collaborative approach, my ability to communicate effectively, and my dedication to delivering high-quality work.

I am always eager to learn, collaborate, and stay up to date on the latest advancements in technology. I look forward to contributing my expertise in impactful ways.

Behind the Scenes of My Netflix Clone

Behind the Scenes of My Netflix Clone Hey everyone! I'm excited to share my latest project, the Netflix Clone, with you. It's been a wild ride, and I'm thrilled to finally have it ready for the world. Building this project was a deep dive into front-end development, UI/UX design, and ensuring a smooth user experience. The goal was to create a visually appealing and functional platform that mirrors the Netflix experience, complete with features like user authentication, movie browsing, and a dynamic interface. ABOUT ME

Ephraim Debel

| Software Engineer & Web Developer

I am a software engineering student at Addis Ababa Institute of Technology (AAiT), with a strong passion for web development. I have completed a full-stack development certificate from Evangadi Tech, deepening my expertise in building dynamic and scalable web applications. My technical skills span modern technologies like React, MySQL, Express, and Firebase, enabling me to create robust front-end and back-end solutions.

Throughout my journey, I've built several full-stack projects, utilizing my knowledge to develop seamless user experiences and efficient database management systems. In addition to my technical abilities, I possess strong communication and leadership skills, which have allowed me to collaborate effectively in team environments and lead projects to successful completion.

I am always eager to learn, continuously refining my skills to stay at the forefront of technology, and I look forward to contributing my expertise in impactful ways.

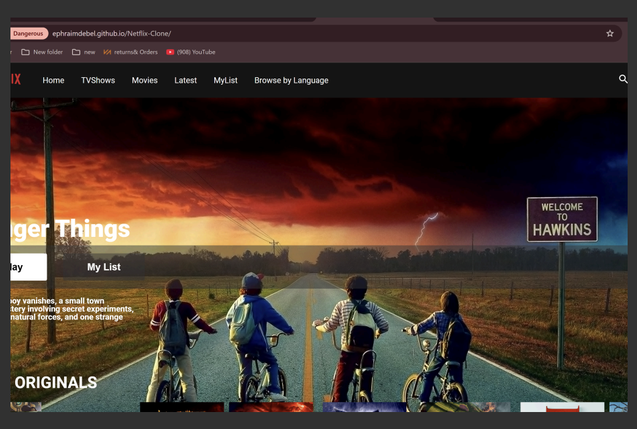
MY BLOG



Behind the Scenes of My Netflix Clone

One of my most exciting projects was building a Netflix homepage clone. I used React for the UI and integrated The Movie Database (TMDB) API to fetch real-time movie data. This blog explores how I handled API requests, implemented infinite scrolling, and ensured the design was responsive for all devices.
